Attached is my resume in response to a current position you have open within your organization for a HSE Advisor.

I offer twenty years of varied experience in the field of safety, oilfield management and transportation that would make me an asset to your organization. Throughout these twenty years I have proven my ability to ensure the various jobs are conducted in a timely manner while at the same time ensuring they are handled as safely and cost-effectively as possible.

I have ensured that pre-job hazard assessments have been conducted prior to the start up of a job and that the pre-job safety meeting is conducted to ensure that all personnel are aware of the potential hazards prior to the commencement of the work. I have conducted incident investigations and site audits and I ensure that work is performed to meet the required regulations as well as being responsible for the health and safety of all personnel at the sites.

I have my OH&S certification through the University of Alberta and plan to continue on to receive my CRSP designation. I believe that all of my work experience, in addition to my OH&S knowledge, makes me a good candidate for a position within your organization and I look forward to hearing from you.

Please do not hesitate to contact me at home (403) 274-1191 or on my cell (403) 804-3910.
