I offer twenty years of experience in the areas of oilfield safety, training, procedures and transportation and specifically the management of the following:

- Occupational Health & Safety Requirements
- Safety training
- Incident Investigations
- Health & Safety Legislation
- Health & Safety Audits
- Safety Management & Regulatory Awareness for Wellsite Supervision (ENFORM)
- Development and implement company safety programs (ENFORM)
- Oil & Gas Production Operator (ENFORM)
- Gas Production Operator (ENFORM)
- Spill evaluations
- Oilfield restorations
- Fleet maintenance
- Operation of warehouse shipments
- Class One driving license (transportation of hazardous materials as well as general freight throughout Canada and the United States)

I have oilfield site experience from wellheads to gas plants and would oversee the pre-job safety and tailgate meetings. I have supervised the removal of contaminated soil, of which many sites were hot sites as well as the removal of waste from gas plants during large turnarounds. I have supervised jobs that have consisted of over 90 pieces of equipment and the coordination of 80 tractor trailers, hoes, cats, etc.
