Chemical Safety: It's More Than WHMIS

Presented by: **Robert Hallsworth**

SDS RiskAssist™
rilleatechnologies.com

- ① **How to Turn Information into Action**
- ② **Why Hazards Are Easier than Chemicals**
- ③ **How Data Can Reduce Your Workload**
- ④ **Case Study - From WHMIS to Chemical Safety**
- ⑤ **Chemical Safety - Steps You Can Take Now**

About the presenter

Rob Hallsworth

CO-FOUNDER RILLEA TECHNOLOGIES INC.

Rob brings his experience as a Professional Engineer, Supervisor, Manager and Executive to the entrepreneurial world as a co-Founder of Rillea Technologies. For over 30 years he has helped organizations reduce workplace injuries, improve product quality, lower costs and increase output. The keys to these improvements have been his natural curiosity, measuring what matters and outlining activities to improve performance in a clear and simple way.

At Rillea, Rob's ability to cut to the chase has been instrumental in developing the revolutionary software that takes complex regulations, an overabundance of paperwork, and opaque scientific jargon and creates simple, actionable information for Managers, Supervisors and Workers.

Within its broad customer base (educational, manufacturing, medical, municipal and research organizations) Rillea has demonstrated that significant improvements in chemical safety can be made by providing clear information and simple instructions.

Use Data - The "Dirty Dozen"

Identify Common Controls

NOTES:

We've built our knowledge of chemical safety, Canadian regulations and operations through decades of work in high-risk environments. We've combined the best chemical handling practices of Rillea Technologies with an accessible, intuitive and intelligent digital tool - SDS RiskAssist™.

SDS RiskAssist™ digitizes safety data sheets & instantly re-orders the data the way a safety consultant would so that you can make informed decisions about chemicals management. It also compares your chemical collection to regulations so that you can quickly assess where your biggest risks are. Company directives can easily be added to 1-page summaries and communicated clearly to employees via the SDS RiskAssist™ web app, when and where they need it.

Our Vision:

Enable people and the planet to prosper by enjoying the benefits of chemicals while avoiding the collateral damage to workers and the environment.
